DEADLINE FOR ARTWORK SUBMITTAL: May 14, 2010 at 5:00 p.m.

Metabolism is the process by which your body converts what you eat and drink into the energy you need for your body to function. It's the building block that enables your cells and organs to work properly. Metabolism is also central to the UNC NRI's research – the NRI is dedicated to understanding why people's metabolism and nutrition requirements differ and how we can use this knowledge to make people healthier. The purpose of the NRI's Art Contest is to encourage you to think about health and nutrition in creative ways and understand the role your metabolism plays in your overall well-being.

Send us your artwork depicting metabolism, energy, and how nutrition contributes to overall health and wellness. What gives you energy and how you use that energy? What gets your heart pumping, gets you moving and revved up? Winners of the contest will have their talent recognized and displayed in a leading international research center- the UNC Nutrition Research Building in Kannapolis, NC!

For complete contest rules and entry form, please visit our website at www.uncnri.org, or contact Ryan Dayvault, 704-250-5000, ryan_dayvault@unc.edu or Virginia McCombs, 704-250-5034, vmccombs@email.unc.
